

## viastore cookie policy

### 1.1 Session cookies

Session cookies are cookies that are automatically deleted at the end of a session (when the browser is closed).

### 1.2 Identification key

Often the cookies do not have any actual content, rather an identification key is stored. This is used to clearly assign the real data that is temporarily stored on the web server for the duration of the session to the person visiting the website.

### 1.3 Currently used cookies

NAME	STORAGE DURATION	PURPOSE
PHPSESSID	End of the session	PHP standard session identification. (Content e.g. 2naniklbt08c70a8dvh6i2ml01)
cookies_accepted	356 days	Indication if the user has accepted the use of cookies
fe_typo3_user	End of the session	<p>TYPO3 standard session identification. The session itself makes it possible to use various functions on the page:</p> <ul style="list-style-type: none"> <li>- The form data that is entered is stored in order to permit multi-level forms, server-side validation and confirmation pages. After successfully sending the information in a form, the data is already removed before the session is ended.</li> <li>- The number of search hits per page is stored to permit the pagination of the general website search. This is important when the person visiting the website autonomously can set the number of search hits. (This feature is currently not active)</li> <li>- The current browser language is stored in order to automatically deactivate the detected language after one-time implementation.</li> <li>- Only for my.viastore.com: Used to identify the logged in user to maintain the login status.</li> </ul>

## 1.4 Applications

### 1.4.1 Google Analytics

Only simple page tracking is integrated. The IP address is transmitted in autonomous form. The following cookies are known:

NAME	STORAGE DURATION	PURPOSE
__utma	2 years from the last update	This is used to distinguish users and sessions and contains a clear identification key.
__utmb	30 days from the last update	This is used to detect new sessions and visits and contains a clear identification key.
__utmc	End of the session	This is used in combination with the __utmb cookie to detect new sessions and visits and contains a clear identification key.
__utmt	10 minutes	Used to throttle request rate.
__utmz	6 months from the last update	Stores the source or campaign that explains how the user reached the website.

Further information can be found at

<https://developers.google.com/analytics/devguides/collection/analyticsjs/cookie-usage>.

### 1.4.2 YouTube Videos

Videos are provided via YouTube on the page (e.g. <https://www.viastore.com/de/intralogistik-beratung/>).

Further information can be found at <https://policies.google.com/privacy?hl=de&gl=de>,  
<https://policies.google.com/technologies/types?hl=de>.

In addition, YouTube sets additional cookies under the domain .youtube.com in order to provide the required video including the player via IFrame. No user-specific data is stored.
